

DENTAL CONSENT ADDENDUM
BROWN CREEK ANIMAL HOSPITAL
704-272-5500

With dental procedures, there can be issues that arise during the procedure that also need to be addressed. The most common issue is loose and diseased teeth. These teeth can cause a myriad of health issues for your pet including:

- Extremely sore and painful teeth
- Endocarditis (infection of the heart valves)
- Numerous oral/throat inflammation issues
- Tooth root abscesses
- Halitosis (putrid smelling breath)
- Gum and bone resorption with exposure
- Septicemia with potential for organ involvement

Any tooth that is loose and diseased needs to be extracted!!!

An extraction fee applies per tooth: non-surgical \$9.50, surgical \$35.00

If teeth are extracted, the animal will be placed on antibiotics and pain medications (price varies with size of animal; can give estimate upon request).

Please read and initial beside ONE option:

- **Option A:** I authorize any necessary tooth extractions. _____
- **Option B:** I would like the Dr/Technician to call me prior to extracting any teeth. If I am **NOT** available extract teeth at doctor's discretion. _____

Phone Number to reach me: _____

- **Option C:** I do **NOT** authorize any extractions. _____

Dental Upgrades

The following upgrades are not included in the standard dental price but are available for an extra fee.

OraVet Barrier Sealant

OraVet Barrier Sealant is applied during the dental procedure. The sealant binds to the tooth enamel to create an invisible barrier that prevents plaque-forming bacteria from attaching. Extends the benefit of dental prophylaxis by at least 2 weeks. **Sealant application \$37.00**

OraVet Plaque Prevention Gel Home Kit

Keep your pet's mouth fresh and clean with the OraVet Plaque Prevention Gel for Pets. A great solution for pets who don't tolerate brushing well, this gel acts as an invisible barrier to help prevent the formation of harmful plaque and tartar. Tasteless and odorless, it's easily applied by swabbing over the gum lines with the included applicator, making at-home dental care a breeze. Just use once a week in between regular dental cleanings. **8 week supply \$30.00**

OraVet Dental Chews

The chewing action works to loosen and dislodge plaque to help it break away from teeth. OraVet Chews form a barrier to help protect against the bacteria that leads to plaque buildup for a cleaner mouth and fresher breath. OraVet chews come in various sizes and either 14 or 30 day supplies. **Prices vary.**

I Do Not Want Any Upgrades
